

ATTENTION PLANT PERSONNEL

Hydroblast Safety and Training Demo Day

See safe practices and training live and learn how your organization can benefit!

WHY ATTEND

Every year there continue to be serious incidents in our industry even as safety devices, PPE, automation tooling and best practices advance. Even though this activity is frequently outsourced, as stakeholders we all have a moral responsibility to improve industrial cleaning safety. **The good news is that standardized credentialing can:**

- Help contractors **hire and retain experienced workers** in the industry, enabling **safe and efficient cleaning operations**
- Standardize terms and practices to **improve communication** in the field and between contractor/client
- **Prevent incidents and near misses, improve cleaning outcomes, reduce rework, and lessen downtime**

LEARNING TAKEAWAYS

- What does 'right' look like for high pressure water cleaning? What best practices can be referenced to field-identify unsafe work practices?
- How is WJTA training and certification structured?
- How can service providers obtain WJTA training and certification? What are some challenges they may run into and how are they addressed?
- What options exist to train plant associates?
- What improvements can the client see from requiring standardized operator credentials? How can this be tied to KPIs?

AGENDA

Presentation/Introduction

- What does correct hydroblasting look like?
- Keynote - Doing the Job Safely - Every Time with Sam Smolik
- What is WJTA Training and Certification and why is the structure uniquely effective for knowledge retention?
- WJTA classroom training example with key takeaways for asset owners to field-identify unsafe practices

Training Demonstration

- See a portion of WJTA training LIVE with manual and automated cleaning
- WJTA Master Trainers will illustrate key safety and operational best practices

Reception

- Enjoy complimentary cocktails, tour equipment setups up close, ask questions and share success stories

WHO CAN ATTEND

Closed event delivered solely for Management, Maintenance, Operations, HSE, TAR associates from industrial facilities where high pressure water cleaning is performed

WHEN / WHERE

December 8, 2022
2:00-4:15pm Presentation and Demo
4:15-5:00pm Reception

Health and Safety Council (HASC)
5213 Center Street, Pasadena TX

HOW TO ATTEND

Free to attend for Asset Owners. Space is limited - to RSVP scan the code or visit bit.ly/3gARQPY
